

Jellyfish

Term 2 Curriculum Plan

ENGLISH

Title: Advertisement

In this unit students will examine persuasion in advertisement and product packaging. They will identify and analyse the use of characteristic ideas and persuasive techniques. They will describe the effects of persuasive techniques used on a breakfast cereal package and report to peers. Students will write and present a persuasive speech to promote their cereal. Students will be assessed in both written and verbal forms this term.

MATHS

Title: Number and Chance

Number

In Year 3 students will design and develop a maths game and complete a short test to demonstrate your ability to do addition and subtraction estimations and calculations. In Year 4 students will design and develop a maths game to demonstrate their ability to do addition, subtraction, multiplication and division estimations and calculations.

Chance

In Year 3 the students will participate in probability experiments and simulations by conducting repeated chance experiments. They will demonstrate your ability to add and subtract two- and three-digit numbers using flexible strategies. In Year 4 the students will participate in probability experiments and simulations by conducting repeated chance experiments. They will use their investigations to answer the question: [What is the likelihood that Beth will get a six every time she rolls the die?](#)

SCIENCE

Title: Life Cycles

Ready, set, grow! In this unit students will investigate life cycles and sequence key stages in the life cycles of plants and animals. They will examine relationships between living things and their dependence on each other and on the environment. By considering human and natural changes to the habitats, students will predict the effect of these changes on living things, including the impact on life cycles and the survival of the species.

VISUAL ARTS

Title: Tiny Worlds

Students will explore human connections to real and imagined places as inspiration for constructing mixed-media artworks. Students will have the opportunity to create a 'Tiny World' using many different forms of material, including, paper, egg cartons, cardboard etc.

TECHNOLOGY

Humpy Dumpty!

The focus for this unit reusing and recycling materials to complete a challenge. This unit's challenge is based on the classic egg drop. Students will learn about different materials, their properties and how they can be joined together.

For their assessment, will create a container that can hold a raw egg and allow it to be dropped from a height without breaking.

Title

This term we will be looking at developing our track and field skills ready for the upcoming carnival. Students will practice long jump, high jump, shot put and running events.
During health this semester students will continue to understand the qualities of being a good friend. They will identify different qualities of what makes a good friend in scenarios.

PE: Students will not be assessed this term for athletics. They will showcase their skills at our carnivals.
Health: student will complete a written assessment.
